Manektech

The next generation Trust company

We work with starts-ups, small-mid sized company and fortune 500+ companies.

About ManekTech

We're here to provide you with the competitive advantage you require. We accomplish this by developing, improving, and supporting the software applications that harness your business, motivate your employees, and fascinate your consumers. We focus on solutions that align with your organization's strategy and objectives. We use technical brilliance and extensive software development to make it work for your business goals.
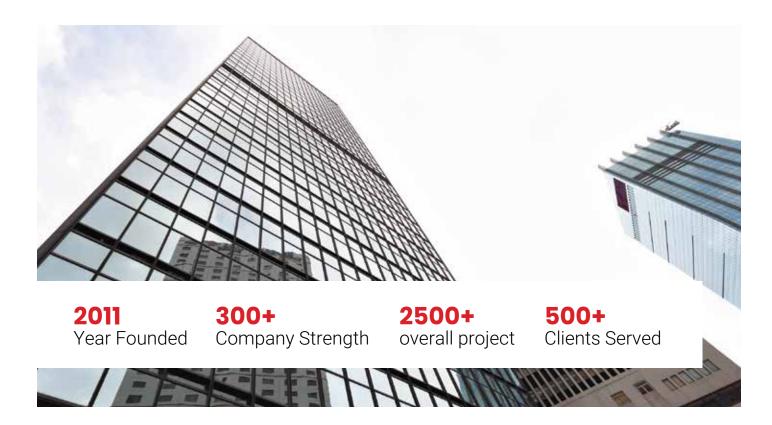

ManekTech started its **journey in 2011** with the sole objective of serving clients with agile, scalable, and resilient digital solutions. Over the years, we have established a flourishing work culture with our robust team of vastly experienced personnel. We serve around the globe.

Mission

At ManekTech, we keep ourselves open to embrace the ever-changing landscape of the digital world thereby giving ourselves room to expand and adapt to the emerging tech trends. Our ability to upgrade ourselves enables us to notch up our client-centric solutions and in turn, boost their online presence

Vision

We have the vision to see our organization bring the desired digital revolution, one that's achieved through our outstanding services, quality products, versatile solutions, and of course, our commitment to introduce change in the most feasible and cost-efficient ways.

What our client says

> My company utilizes ManekTech for assistance with expediting our production. They have provided exceptional service thus far during the numerous projects I have contracted them for, and I continue to work with them. Great company, great team, and great pricing.

Codex Software
UNITED STATES OF AMERICA

> I was at first worried about doing business with developers in another country as I am based in the UK, but I had spoken to a guy from Manektech called Anil, who assured me that using Manektech for all my development work would not be a risk at all and they have proven me right.

Lasbak Oke
CANADA

> ManekTech is the best choice among the crowd for top-notch high-quality AngularJS product development.

Who We Work With?

Whether you are having a start-up idea or you are a small business and want to scale up or an enterprise that wants to automate and make the process better for their business, at Manektech we have versatile experiences by creating, upgrading, and supporting software solutions that help your business run smoothly, and captivate your customers. Not only the business, but we also work with government agencies across the globe. So, If you are a start-up, Small and Medium-sized business, enterprise, fortune 500, or government, we are the right fit for your IT solutions as we simply believe in the "Get the things done."

We Work With Startups, Small Business and Enterprises

Start-ups
Witness the unlocking of technological advancements with the out-of-box ideas of young, brilliant minds coupled with ManekTech's rapid app development services.

Mid-Sized Businesses
For all those mid-sized businesses which dream of making it big, ManekTech brings forth its target-specific services priced at the most moderate rates.

Enterprises
Working with a whole suite of ERPs, CRMs, databases and cloud technologies, ManekTech efficiently handles the complexity of web development presented by enterprises.

Engagement Model

We provide four alternative engagement models, allowing companies and startups to select the one that best matches their project needs.

1. Fixed Cost

The name of the engagement model speaks for itself: if consumers declare a certain price (or, at the very least, a price range), a software development outsourcer will commit to supplying a set of services within the agreed-upon bid invoicing.

• According to the fixed bid project model, if there is a comprehensive specification, the price for developers' work is consistent.

• Once the contract is given, there is a rigorous timeline for completing the job.

• Companies are not required to reimburse any additional expenditures above what is specified in the agreement.

2. Hourly Rate

In this engagement style, you may contact directly with the hired expert and discuss your needs. You may also make adjustments during the development process and opt for extra features if necessary. ManekTech's manager will operate under your supervision and make changes/fixes following the specifications of your project. The overall cost is exactly proportionate to the time and resources required to complete the project under this paradigm.

• Ideal for needs that are frozen or have a very specific set of requirements.

• The client pays a set fee.

• Minimal risk exposure

• The extremely clear development procedure

3. Dedicated

You may employ a whole team, including Android and iPhone developers, a backend web developer, a UI/UX designer, a quality analyst, and a project manager, under this approach. ManekTech gives you a project manager to overlook your project needs, and he or she will oversee the entire team and the project.

• Hiring a specialized team from an outsourced software development business is far less expensive than hiring in-house expertise

• The project team will be entirely focused on your project.

Why Choose ManekTech?

ManekTech makes globalization simple With the offshore software development services, your company may simply take advantage of the benefits of globalization and offshore outsourcing to low-cost regions to considerably cut payroll expenditures.

01

On-Time Delivery of Products

ManekTech deploys a dedicated QA team on each project, especially during mobile & web app development projects, to ensure bug-free, quality mobile & web app development backed by a pre-release system check that preserves control on your allocated time frame.

02

Save Time And Money

This implies that you will receive a high-quality product on time as well as additional support at a cost-effective price.

03

High-Quality Coding And Debugging

We use agile development to provide a high-quality coding cycle, as well as expert software testing to ensure a bug-free and timely delivery.

04

App Upgrading and Upkeep

ManekTech provides contracts for app upgrades as well as maintenance to ensure complete compatibility with the newest OS version and features.

05

High-tech safety

Your sensitive data and security must be never compromised. Using an offshore corporation ensures total protection for your data and other assets, making them very safe and secure.

06

Services Following the Launch

These organizations provide full maintenance and post-launch services to ensure that issues are repaired and your software or website is always up to date.

Infrastructure

At ManekTech, we ensure that our staff has access to an agile and resourceful infrastructure, allowing them to be empowered with creativity while also providing robust service to our clients. We collaborate as a unified service delivery force The emphasis is on customer happiness as well as ensuring the clients' IT maturity is consistent and predictable.

24*7 CCTV Surveillance

Round the clock monitoring of systems and servers

Cloud configuration with premium services like Google and AWS for optimum security

Robust Firewall Protection to reinforce security for cyber threats, malware and fraudulent

Timely updates and upgrades done of systems and software to keep their performance intact

Networks of Trust

ManekTech holds the trust factor a key element to establish lasting relationships with our clients. That's why we have a network of high-end software, modernized hardware and secured networking systems. Talk to our experts to know more about our infrastructure.

Servers	Network	Server OS	Databases
IBM High-end cluster servers & IBM Storage	CISCO's manageable switches L2 & L3 for secured network	VMWARE ESXi	MySQL
		Ubuntu	MsSQL
Dedicated cloud based demo servers for application demonstration	CAT6 network cables	CentOS	PostgreSQL
			NoSQL
	vLan for secured network traffic
