

Kaushal - Sr. React Js Developer

Experience: 4.5+ Years

Education: MSc

Synopsis

- 4.5+ years of experience as a Senior React.js Developer, specializing in React.js, Angular.js, and Next.js for building dynamic, scalable web applications.
 - Proficient in React Native (Native - Expo) for developing cross-platform mobile applications with seamless performance.
 - Expert in state management using Redux and Saga, ensuring efficient data flow and application scalability.
 - Hands-on experience with ANTD Template and FUSE Theme, enhancing UI/UX with modern design patterns.
 - Strong database expertise in MongoDB, optimizing queries and data handling for high-performance applications.
 - Experience in web performance optimization, improving FCP (First Contentful Paint), LCP (Largest Contentful Paint), TBT (Total Blocking Time), and CLS (Cumulative Layout Shift).
 - Update Line - Ensured high code quality by utilizing reusable components, custom hooks, and modular functions to enhance maintainability and scalability.
 - Proficient in GitHub, GitLab, SonarQube (for code quality, bug detection, and security solutions), Jira, Zoho Books, Asana, and Trello for efficient project management and collaboration.
 - Worked on SaaS-based products, e-commerce, hospitality, food management, healthcare, and automotive industries, delivering secure and scalable solutions.
 - Developed CRUD forms, role-based secure applications, and medicine management systems, ensuring compliance with industry standards.
 - Expertise in SEO optimization, CI/CD pipelines, and automation, improving deployment efficiency and search engine visibility.
 - Strong knowledge of TypeScript and JavaScript, enhancing code maintainability and performance.
-

Technical Skills

Frontend Frameworks	React JS, Angular JS, Next JS, Tailwind CSS
Mobile Frameworks	React Native (Native - Expo)
State Management	Redux, Saga

UI Libraries/Templates	ANTD Template, FUSE Theme
Backend/Database	MongoDB
Performance Management	FCP (First Contentful Paint), LCP (Largest Contentful Paint), TBT (Total Blocking Time), CLS (Cumulative Layout Shift)
Project Management Tools	GitHub, GitLab, SonarQube (Detect Bugs, Code Quality, Security Solution), Jira, Zoho Book, Asana, Trello
Testing	Unit Testing for Services and Components, Manual Testing
Domains/Projects	SaaS-based Products, E-commerce, Hospitality, Food Management, Healthcare, Automotive
Other	CRUD Forms, Secure Applications, Role-based Medicine Management, SEO Optimization, CI/CD Pipeline, TypeScript, JavaScript

Recent Projects

1. Project Name: Footrax

Description: A Sports GPS Tracker monitor your gaming performance, and tracks your playing games, no. of playing games, speed, travelled distance and more with Football Tracker. As a sports tech company, Footrax is developing wearable devices and providing innovative technology solutions for the sports industry in India. It includes software, mobile applications, and devices. These devices are essential for grassroots-level players, emerging kids, sports teams, athletes, and coaches to help them improve their performance and achieve their goals.

Responsibilities:

- Set up the project with ANTD Template, Redux-Saga, Secure Application, Components and Tables.
- Maintain code quality.
- Work closely with backend developers on APIs.
- Conduct manual testing and create.
- Deliver the project within the client's timeline

Technologies: React JS, Node js (Express js), TypeScript, ANTD Templat, Redux-Saga, Zoho Book

2. Project Name: Perk

Description: The Role-based Medicine Management System is a comprehensive application designed to streamline the process of managing medicines within a healthcare facility. This system ensures that different roles within the healthcare organization have appropriate access and functionalities, thus improving efficiency and accuracy in medicine management.

Responsibilities:

- Set up the project with ANTD Template, Redux, and Secure Application based on Roles,

Components and Tables.

- Maintain code quality & state management.
- Conduct manual testing and create documentation.
- Deliver the project within the client's timeline.

Technologies: React JS, Node js(Express js), JavaScript, ANTD Templat, Redux ToolKit, Zoho Book

3. **Project Name:** Vos Motors

Description: VOS Motors is the largest super sports dealer in Ontario carrying Yamaha, Suzuki, Aprilia, Moto Guzzi, and Vespa motorcycles. Two & Four-Wheeler Dealership. Contributed to VOS Motors, Ontario's largest super sports dealership, specializing in the sale of new and pre-owned motorcycles, cars, RVs, ATVs, and snowmobiles. VOS Motors represents top brands including Yamaha, Suzuki, Aprilia, Moto Guzzi, and Vespa. The dealership also provides a comprehensive range of financing solutions, including auto loans, leasing options for motorcycles, cars, and commercial vehicles, as well as specialized financing for home loans, RVs, snowmobiles, and commercial trucks. Played a key role in streamlining sales processes, enhancing customer experiences, and supporting the implementation of flexible financial products to meet diverse customer needs in both retail and commercial sectors.

Responsibilities:

- Set up the project with FUSE Theme, Redux, Secure Application, and Components.
- Maintain code quality.
- Collaborate closely with team members, assign daily tasks, and oversee the progress of the Project and timeline.
- Conduct manual testing and create.
- Attend daily client meetings to update work progress and share suggestions.
- Deliver the project within the client's timeline.

Technologies: React JS, Node js (Express js), JavaScript, Fuse Template and Customise based on Client requirements, Redux ToolKit, Jira

4. **Project Name:** Sales Booster

Description: B2B Service Provided. Manage Employee, Employee Task, Leaves, Active Projects, Policy, Holidays, Upcoming Birthday, Work Timeline. Developed and managed a comprehensive B2B service platform designed to streamline employee management and project coordination for businesses. The platform enables efficient tracking of employee tasks, leave management, policy adherence, and project timelines. Key features include monitoring active projects, scheduling holidays, tracking upcoming birthdays, and ensuring smooth workflow through work timeline management. This solution enhances operational efficiency, fosters employee engagement, and supports businesses in maintaining seamless HR and project management operations.

Responsibilities:

- Set up the project with Customize UI, Redux, and Components.
- Maintain code quality to ensure seamless conversion to Next.js if needed (Seo).
- Collaborate closely with team members, assign daily tasks (API), and oversee the progress of the Project.
- Attend daily Project Manager meetings to update work progress.

Technologies: React JS, Laravel, JavaScript, ANTD, React Bootstrap, Redux ToolKit, Jira

5. **Project Name:** Hotel Apartments

Description: Premium Furnished Apartments for Rent (Hotel Room Booking). The global destination for fully serviced hotel apartments and villa extended stays. Developed and managed a platform offering premium furnished apartments and villas for rent, catering to both short-term hotel stays and extended stays. The service provides fully serviced, high-end accommodations, combining the comfort of home with the convenience of hotel amenities. This platform serves as a global destination for travellers seeking luxurious, fully equipped living spaces for business, leisure, or relocation needs, ensuring a seamless and comfortable experience throughout their stay.

Responsibilities:

- Set up the project with Customize Template, Redux, Secure Application, and Components.
- Maintain code quality.
- Collaborate closely with team members, assign daily tasks, and oversee the progress of the project and timeline.
- Conduct manual testing and create.
- Attend daily client meetings to update work progress and share suggestions.
- Deliver the project within the client's timeline.

Technologies: React JS, Node JS (Express js), JavaScript, Custmise Design, Redux ToolKit, Jira

6. **Project Name:** DR Hievy

Description: Patient Management, Reports, Medicine, Personal Details [Video Calling – Agora]

Responsibilities:

- Set up the project with Customize Template, Redux, Secure Application, and Components.
- Maintain code quality.
- Collaborate closely with team members, assign daily tasks, and oversee the progress of projects and timelines.
- Attend daily F2F client meetings to update work progress

Technologies: Angular JS
