Kriti - React Js Developer

Experience: 3.5+ Years

Education: BE

Synopsis

- Over 3.5 years of experience as a React JS developer, specialising in frontend development for web applications.

- Proficient in HTML, CSS, and JavaScript, with expertise in frameworks including React, Next.js, Bootstrap, Tailwind CSS, and Material UI.

- Skilled in backend development using Express.js to build RESTful APIS, ensuring seamless integration with frontend components.

- Hands-on experience in database management with MySQL, optimising data access and storage for scalable applications.

- Strong proficiency in version control systems like Git, with practical knowledge of GitHub and Bitbucket for collaborative code management.

- Experienced in Agile methodologies, participating in sprint planning, daily stand-ups, and retrospectives to ensure project milestones and deadlines are met effectively.

- Familiarity with project management tools such as Jira for task tracking and team collaboration.

- Competent in development environments including Visual Studio Code for coding and debugging, and Postman for API testing and documentation.

- Adaptability across macos and Windows platforms, ensuring productivity and efficiency in different operating environments.

- Excellent problem-solving skills, with a focus on delivering robust applications that meet client requirements.

- Strong communication skills, adept at translating technical concepts to non-technical stakeholders, facilitating smooth project execution and client satisfaction.

Technical Skills

Frontend	HTML, CSS, React, Next.js, Bootstrap, Tailwind CSS, Material UI

Backend	Express.js, RESTful Web services
Database	MySQL
Code Repository	Git, GitHub, Bitbucket
Project Management	Jira
Development Tool	Visual Studio Code, Postman
Operating System	Mac OS, Windows
Methodology	Agile
JavaScript Framework	React JS
JavaScript	JavaScript, TypeScript

Recent Project

1. **Project Name:** Bookify App
   Role: Frontend Developer
   Description: The Bookify App is a versatile platform designed to streamline the booking process for a diverse array of spaces within a building. It caters to a wide range of needs, from reserving essential meeting rooms and convenient parking spots to managing visitor day passes.
   The app includes robust features such as tenant account management, allowing tenants to easily oversee their bookings and preferences. Additionally, an administrative section empowers admins to create and manage floor plans efficiently, ensuring optimal utilisation of space.
   Responsibilities: As the front-end developer, my primary tasks involve transforming the previous user interface to integrate the latest design standards specified by the client. Additionally, I am enhancing front-end functionalities to streamline processes and ensure a more user-friendly experience.
   Technologies: HTML, CSS, Bootstrap, and React JS are the core technologies
   Duration: 5 Months

2. **Project Name:** BuiltSite.io
   Role: Frontend Developer
   Description: This is a page editor which allows the user to create their web page by dragging and dropping the components (FAQ, Banners, Headers, Footers, etc) and can publish on the domain
   Responsibilities:

- Led the development of a dynamic web application, leveraging Craft.js to seamlessly build and integrate React components.
- enabling efficient component-based architecture.
- Additionally, incorporated Chargebee for subscription management, ensuring a seamless and secure subscription process for users.

Technologies: React, Next.js, TypeScript, Tailwind, Bootstrap, Craft.js, ChargeBee

Duration: 5 Months

3. **Project Name:** E-Commerce Shopping Application

   Role: Full Stack Developer

   Description: This is a clone of the Amazon shopping app. It includes a listing of products, selecting the products, showing the total price in the cart and lastly making a payment through the payment gateway.

   Responsibilities:
   - An E-commerce web application that contains basic functionality like displaying, searching, reviewing, and rating the products, displaying order lists, and placing orders using the PayPal payment method.
   - The full-fledged project includes user and admin authentication.
   - Used Redux for state management and Bootstrap CSS to make it responsive.

   Technologies: React, Tailwind, Bootstrap, Express.js,

   Duration: 2 Months
