Kaushik - Sr React Native Developer

Experience: 5+ Years

Education: Bachelor of Engineering in Information Technology

Synopsis

- Proficient React Native and React.js Developer with over 5 years of experience in the IT industry, specializing in cross-platform mobile apps and web app development.
- Skilled in React Native and React.js framework, capable of building high-quality mobile applications for iOS and Android platforms and web apps.
- Experienced in working with macOS and Windows operating systems, ensuring compatibility and performance across different environments.
- Experience in unit testing using Jest to ensure reliability and proper functioning of apps.
- Proficient in database management with SQLite, ensuring efficient data storage and retrieval for mobile applications.
- Well-versed in using a variety of development tools like Visual Studio, Xcode, Android Studio, BitBucket, GitHub, and Trello for streamlined development workflows and collaborative projects.
- Familiarity with Flutter, with a beginner-level understanding, showcasing adaptability and willingness to explore new technologies.
- Strong problem-solving skills and attention to detail, with a proven track record of delivering robust and user-friendly mobile applications.
- Effective communication and teamwork abilities, collaborating closely with cross-functional teams to deliver projects on time.

Technical Skills

Programming Skills	React Native, React.js Javascript, Typescript, Android
Operating System	MacOS, Windows
Database	SQLite
Tools	Visual Studio, Xcode, Android Studio, BitBucket, GitHub, Trello, Postman
Skills	ES6, Jest, NPM, REST APIs integration, Redux, Mobx, Hooks, OOP, Push Notifications, In-App Purchase, Third-party payment integration, Localization, Google services integration

Role & Responsibilities

- Expertise in React Native and React.js app development
- Closely worked with analysis, development, and quality assurance teams for various projects.
- Maintain coding and product standards
- Client communication and reporting to the client
- Analyze system specifications and translate system requirements to task specifications

Recent Projects

1. **Project Name:** Kcal Meal Plans
   Role: React Native Developer
   Description: The Kcal Meal Plan application is a cutting-edge platform that revolutionizes healthy eating and weight management. Designed to serve users in the UAE, the app offers seamless access to personalized, freshly cooked, and wholesome monthly meal plans. It caters to individuals seeking a healthy lifestyle with convenient diet food delivery options.
   Responsibilities: Analysis and Understanding Client Requirements, Maintaining Coding Standards and Guidelines, creating Projects from Scratch, Design User-Friendly Dynamic UI, API integration, Third Party Library Integration, Client Communication, Deliver App to Client, Solved Unexpected bugs, Handling native functionality by bridge, Creating Custom Animations.
   Technology: React Native, Javascript, Typescript, Redux, Jest, Apple Health, Samsung Health, Push Notification, Payment Gateway, Apple Pay, REST API integration
   Duration: 10 Months

2. **Project Name:** Products web app
   Role: React.js Developer
   Description: The Products web app is a web-based platform designed for monitoring of products. It enables users to retrieve product details, view and update configurations by scanning QR codes. The process begins with operator verification—scanning a QR code to confirm authorization. Once validated, the operator can scan individual product QR codes to access detailed configurations, update settings, and finalize the process efficiently.
   Responsibilities: Analysis and understanding client requirements. Maintaining coding standards and guidelines. Design user-friendly dynamic UI, API integration, Client communication, Deliver app to client, QA/testing, Solved unexpected bugs.
   Technology: React.js, Tailwind-CSS, Javascript, Redux
   Duration: 6 Months

3. **Project Name:** ConnectSphere
   Role: React.js & React Native Developer
   Description: ConnectSphere is an innovative social networking platform designed for individuals seeking open and meaningful connections. It provides a secure and inclusive space to meet like-minded people, build friendships, and explore relationships within a welcoming community. Whether you're looking for new experiences or deep conversations, ConnectSphere fosters authentic connections in a supportive environment.
   Responsibilities: Analysis and Understanding of Client Requirements, Leading team to Complete Milestone on Time, Maintaining Coding Standards and Guidelines, Design User-Friendly Dynamic UI, API integration, Third Party Library Integration, Client Communication, Deliver App to Client, Solved Unexpected bugs
   Technology: React.js, React Native, Javascript, Redux, Push Notification, REST API integration
   Duration: 9 Months

4. **Project Name**: U2 Ecommerce
   Role: React Native and React.js Developer
   Description: This is an e-commerce app for clothes. I have worked in a team as a react-native and react.js developer.
   Responsibilities: Analysis and understanding client requirements. Maintaining coding standards and guidelines. Develop new UI components and business logic. Implement the design of screens and pages, API integration, Client communication, Deliver app to client, QA/testing, Solved unexpected bugs.
   Technologies: React.js, React Native, VS Code, Javascript, REST API, Push Notifications
   Duration: 1 Year and 2 Months

5. **Project Name:** Moments Meals
   Role: React Native Developer
   Description: Moments is the UAE's first family-oriented meal planning app, designed to simplify mealtime with nutritious, kid-approved meals. The application provides families with a seamless and convenient way to order healthy, delicious food tailored to their needs.
   Responsibilities: Analysis and Understanding Client Requirements, Maintaining Coding Standards and Guidelines, creating Projects from Scratch, Design User-Friendly Dynamic UI, API integration, Third Party Library Integration, Client Communication, Deliver App to Client, Solved Unexpected bugs, Handling native functionality by bridge, Creating Custom Animations.
   Technology: React Native, Javascript, Typescript, Redux, Jest, Push Notification, Payment Gateway, Apple Pay, REST API integration
   Duration: 9 Months

6. **Project Name:** Fuel-Up by Kcal
   Role: React Native Developer
   Description: Fuel-Up by Kcal is a cutting-edge meal prep application designed for fitness enthusiasts who prioritise nutrition as much as their workouts. The app delivers macro-precise meal planning, ensuring users can achieve their fitness goals with tailored, results-driven nutrition solutions.
   Responsibilities: Analysis and Understanding Client Requirements, Maintaining Coding Standards and Guidelines, creating Projects from Scratch, Design User-Friendly Dynamic UI, API integration, Third Party Library Integration, Client Communication, Deliver App to Client, Solved Unexpected bugs.
   Technology: React Native, Javascript, Typescript, Redux, Push Notification, Payment Gateway, Apple Pay, REST API integration
   Duration: 3 Months

7. **Project Name:** Amuseapp
   Role: React Native Developer
   Description: This project is for historical sites and museums. Users can check the details about any museum or site from this app.
   Responsibilities: UI changes, API integration, Third-party library Integration, New Feature Integration
   Technology: React Native, Javascript, Mobx, Push Notifications, REST API integration
   Duration: 6 Months

8. **Project Name**: ViroScan
   Role: React Native Developer
   Description: The is a medical product selling an Android app that helps in testing and determining if a a person is detected with viral infection or not using the appropriate medical kit. The app is built using React-native. This app is only for their product so it is not published in the Play Store or App Store.
   Responsibilities: Analysis and understanding client requirements. Maintaining coding standards and guidelines. Design user-friendly dynamic UI, API integration, Client communication, Deliver app to client, QA/testing, Solved unexpected bugs.
   Technologies: React Native, VS Code, Javascript, REST API, Push Notifications
   Duration: 7 Months

9. **Project Name**: Mandikate
   Role: React Native Developer
   Description: This is an online trading platform for agricultural commodities. I have worked in a team as a react-native developer.

Responsibilities: Analysis and understanding client requirements. Maintaining coding standards and guidelines. Integrate backend to frontend using context API for global state management and design components for UI and implement the design.

Technologies: React Native, VS Code, Javascript, REST API, Push Notifications

Duration: 8 Months

10. **Project Name**: Moneyly

   Role: React Native Developer

   Description: This is a financial audit mobile app that helps every user to track their salary, expenses, savings, etc., and manages accordingly using react-native.

   Responsibilities: Analysis and understanding client requirements. Maintaining coding standards and guidelines. Develop UI components and business logic. Implement the design of screens, API integration, Client communication, Deliver app to client, QA/testing, Solved unexpected bugs.

   Technologies: React Native, VS Code, Javascript, REST API, Push Notifications

   Duration: 5 Months
