

Sakshi - Sr. .Net Developer

Experience: 6 Years

Education: MCA

Synopsis

- 6 years of professional experience as a .NET Developer, specializing in ASP.NET with C#, .NET Framework, and .NET Core for building robust and scalable web applications.
- Proficient in frontend development using technologies like JavaScript, jQuery, HTML, CSS, and Bootstrap, ensuring responsive and user-friendly interfaces across devices.
- Extensive experience in backend development with a strong grasp of MVC architecture, Microservices, and real-time communication tools like SignalR and Webhooks.
- Expertise in working with MS SQL Server 2014/19, handling database design, query optimization, stored procedures, and performance tuning to support complex applications.
- Hands-on experience with version control systems like Tortoise SVN and GitHub, ensuring secure and collaborative code management for teams.
- Proficient in utilizing development tools such as Microsoft Visual Studio, Visual Studio Code, and SQL Management Studio for efficient coding, debugging, and project management.
- Strong knowledge of Microservices architecture, enabling the creation of scalable, loosely coupled services for enhanced application flexibility and modularity.
- Skilled in using real-time communication frameworks like SignalR to build interactive and collaborative applications that require real-time updates.
- I am experienced in working with project management and collaboration tools like Monday.com and Slack, task tracking, and timely project delivery.
- Adept in MS Office, with solid technical documentation and reporting skills to support project analysis, status updates, and client communication.
