6

Project

NYSE

Keys & Roles

Windows Application Developer, DBA

Technologies

C#

Database

SQL SERVER 2014

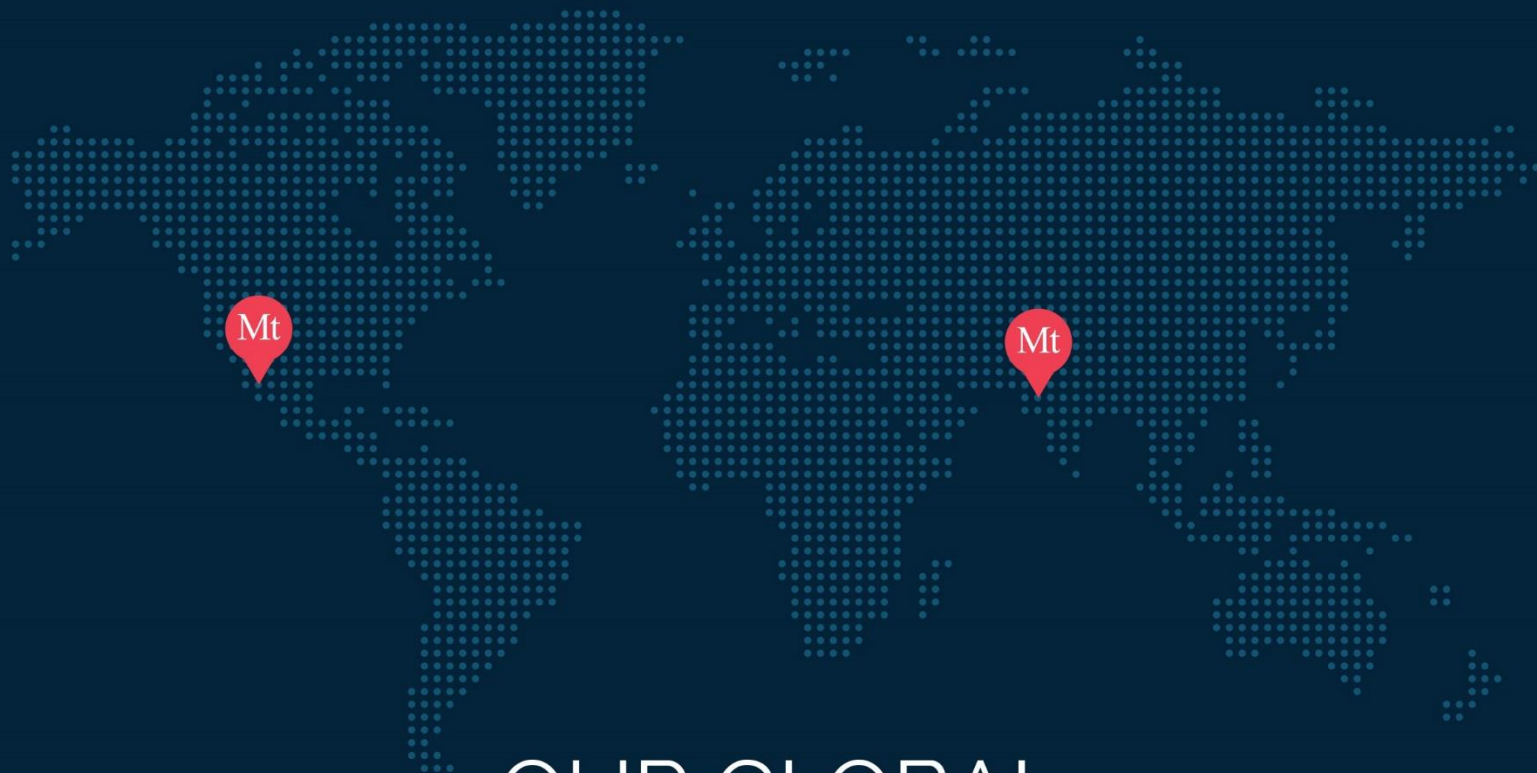

Server

IIS 7.0

Description

The Stock Exchange windows application was developed to fulfill the following:

- Manage clock configuration (as in like font style, text color and background color etc.) to get display of the exact setting that user wants. Clock Management will let user set the clock time in two ways as described in below:
 - Automatic Time: When user select any server/IP listed in drop-down list it will change the system time accordingly from selected Server IP (NTP) Time.
 - Manual Time: Manual Time will directly allow user to enter the date & time.
- Manage Connections: User can configure database connection or change the existing one by entering appropriate details.
- Server Management
- Bell Management: User can specify the bell time for the clock windows by using this form. Two types of the Bell can be scheduled through this
 - Opening Bell
 - Closing Bell
