Why ManekTech?

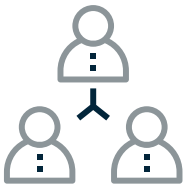

OUR STORY

Established in 2011, Manektech, a company of humble beginnings, began with a handful of professionals who set out to bring reliable, cost effective solutions, to a growing technology world. Our customers value our technical expertise and business savvy, and this is why we have clients in the United States (USA), the United Kingdom (UK), Netherlands, Greece, Spain, Saudi Arabia, Sweden, Australia and South Africa. Throughout our seven-year story, we have successfully established business relationships with over 300 companies globally, and we have completed over 2,000 projects.

TECHNICAL DEPTH

We are a one stop destination for all your technical solutions. Not only do we have an incredible team of technical experts, we work on so many different types of projects, that we always have someone in the company who can provide tribal knowledge and guidance from prior project experience. Our development experience includes platforms Microsoft.net, Android, iOS, PHP, WordPress, Shopify, DotNetNuke (DNN), IOT, Angular JS, Magento, Ionic, Node JS and Larvel.

MANAGEMENT TEAM

Devubha Manek, our company founder, began with a simple premise. Create long term relationships with customers first, while supporting every single team member within the company. When you have both, the business will follow. This is why today Manektech has a company with over 150 employees.

Excellence at Work

Manektech delivers excellence in everything we do. We complete projects timely and have an incredibly well trained and dynamic group of professionals who are continually asking what more they can do to provide you the best possible solutions.

Team spirit

We work hard, and we play hard! After a hard week's work of providing solutions for our customers, you can sometimes catch us at weekend picnics, bowling events and fun company office events where we get to know one another, have a little fun and spend time together as part of our Manektech family.

Vision

Our founder, Devubha Manek, had a clear vision when he began developing cutting-edge technology solutions for our customers in 2011. Devubha's vision includes enriching the lives for our company employees, striving for excellence, maintaining strong family values and building long lasting relationships with our customers. This vision is shared with everyone in the company, not through words, but through actions.
